ABOUT ME

Computing Science undergraduate interested in scalable cloud systems, data-driven applications, and AI-powered platforms. Experienced in building cloud-native and intelligent applications through academic and real-world projects. Currently **seeking an internship from 31 August 2026 to 9 April 2027** to further develop practical industry experience.

EDUCATION

Singapore Institute of Technology / University of Glasgow **Sep 2024 – Present**

- BSc. (Hons) Computing Science (GPA 4.51 / 5.00)

Temasek Polytechnic **Mar 2019 – Apr 2022**

- Diploma in Accountancy and Finance (GPA 3.53 / 4.00)

PROJECTS

Cloud-Native Event Coordination and Management System

- Developed a cloud-native web application to manage and coordinate events for elderly users
- Implemented using **containerised microservices** using Docker to improve scalability and modularity

Food For Thought – AI-Powered Smart Pantry & Recipe Recommendation System

- Implemented image-based ingredient detection using a vision-enabled LLM API to extract ingredients and estimate quantities from grocery photos for automated pantry tracking.
- Designed an **AI-assisted recipe system** using SEA-LION to deliver culturally authentic Southeast Asian cuisine recommendations

UWB LOS/NLOS Classification and Time-of-Flight Predictor (Ongoing Project)

- **Reduced waveform dimensionality** while retaining signal structure via PCA, improving model efficiency and stability.
- **Trained classification and regression models** using Scikit-learn to analyse UWB Channel Impulse Response data.

Gamified Feedback Web Application for an External Client (Ongoing Project)

- Collaborating with Singapore Cancer Society to develop a feedback web application using **Agile Scrum practices**

Scan for more details on my projects!

WORK EXPERIENCE

Financial Advisor Assistant, Great Eastern Financial Advisers **Apr 2021 – Oct 2021**

- Supported client outreach and appointment coordination for financial advisory consultations.
- Communicated financial product information to clients, assisting them in understanding basic advisory services

CO-CURRICULAR ACTIVITIES

- Build for Impact 2026 Hackathon (Participant)

SKILLS / COMPETENCIES

- **Programming Languages**
  - Python , Java, C, SQL
- **Data Analytics / Visualisation**
  - Pandas, NumPy, Matplotlib, Scikit-learn
- **Cloud**
  - Docker, Kubernetes, Microservices
- **Software Tools**
  - MongoDB, PostgreSQL, Jupyter Notebook, Git
- **Others**
  - Accounting and Finance background with understanding of financial statements and business data analysis
