ABOUT ME

Computing Science undergraduate interested in scalable cloud systems, data-driven applications, and intelligent platforms with hands-on experience building cloud-native and AI-enabled applications through academic and real-world projects.

EDUCATION

Singapore Institute of Technology / University of Glasgow **Sep 2024 – Present**

- BSc. (Hons) Computing Science (GPA 4.51 / 5.00)

Temasek Polytechnic **Mar 2019 – Apr 2022**

- Diploma in Accountancy and Finance (GPA 3.53 / 4.00)

WORK EXPERIENCE

Financial Advisor Assistant, Great Eastern Financial Advisers **Apr 2021 – Oct 2021**

- Assisted with customer recruitment efforts for supervisor
- Assisted in coordinating appointments and follow-ups with prospective clients
- Interacted professionally with customers to provide basic information and assistance

PROJECTS

- **Cloud-Native Event Coordination and Management System**
  - Developed a cloud-native web application to manage and coordinate events for elderly users
  - Implemented using **containerised microservices** to improve scalability and modularity

- **Food For Thought – AI-Powered Smart Pantry & Recipe Recommendation System**
  - Integrated **computer vision** to extract ingredients and estimate quantities from grocery photos, enabling automated inventory management.
  - Designed an **AI-assisted recipe system** using SEA-LION to deliver culturally authentic Southeast Asian cuisine recommendations

- **UWB LOS/NLOS Classification and Time-of-Flight Predictor (Ongoing Project)**
  - Designed an end-to-end machine learning pipeline to detect LOS/NLOS conditions and predict signal range from UWB Channel Impulse Response data using **classification** and **linear regression**.
  - **Reduced waveform dimensionality** while retaining signal structure via PCA, improving model efficiency and stability.

- **Gamified Feedback Web Application (Ongoing Project)**
  - Collaborating with Singapore Cancer Society to develop a feedback web application using **Agile Scrum practices**

CO-CURRICULAR ACTIVITIES

- Build for Impact 2026 Hackathon (Participant)

SKILLS / COMPETENCIES

- **Programming Languages**
  - Python
  - Java
  - C
  - JavaScript/ HTML / CSS
  - Rust
  - Kotlin
  - SQL

- **Data Analytics / Visualisation**
  - Pandas
  - NumPy
  - Matplotlib
- **Cloud**
  - Containerization
  - Container Orchestration
- **Software Tools**
  - Docker / Docker Compose
  - Next.JS
  - MongoDB
  - PostgreSQL
  - Jupyter Notebook
  - Git
- **Others**
  - Familiar with Accounting and Finance concepts
  - Understanding of basic financial statements
